HIGH VALUE MINERAL SALTS

Specialty Food & Infant Food Products

Our products for the specialty food and infant formula market consist of high-value mineral salts, of which many are offered with low heavy metal levels, low aluminum levels, and with special particle engineering. These products include the following;

Calcium

- [Tri-Calcium Citrate (powder and micronized grades)
- [Calcium Glycerophosphate
- [Di-Calcium Phosphate
- [Tri-Ca Phosphate
- [Calcium Hydroxide

Copper

- [Copper Sulfate-Anhydrous
- [Copper Gluconate

Iron

- [Ferrous Sulfate
- [Ferric Pyrophosphate

Magnesium

- [Magnesium Acetate
- [Magnesium Lactate
- [Magnesium Glycerophosphate
- [Di-Magnesium Phosphate

- [Tri-Magnesium Phosphate
- [Magnesium Sulfate

Potassium

- [Potassium Acetate
- [Potassium Sulfate

Sodium

- [Sodium Acetate
- [Sodium Carbonate
- [Sodium Phosphate
- [Sodium Sulfate

Trace Minerals (as triturations)

- [Chromium
- [Copper
- [Potassium Iodide
- [Molybdenum
- [Sodium Selenite
- [Sodium Selenate
